## REASONS FOR ALLOWANCE

1. The following is a statement of reasons for the indication of allowable subject matter:

In interpreting the claims in light of the specification and applicant's arguments, the Examiner finds the claimed invention is patentably distinct from the prior art of record.

The prior art of record includes Johnson et al. (Johnson), US Patent No. 6,453,302, Morag, US Patent No. 6,324,545, and Nitta, US Patent Application Publication No. US 2002/0054035.

Johnson discloses a presentation generation system 104 (layout device) generating a presentation (a layout) of published information by using cover page template that defines layout and content or topic of the information. Johnson further discloses template information 28 (template storage), which includes templates used by the presentation generation system 104. Johnson further discloses the presentation generation system 104 identifies appropriate a cover page template defining a cover page based on customer information, the presentation generation system 104 then integrates the template with the information to form a presentation (a layout of the published information). Johnson further discloses receiving customer information in the memory arrangement to automatically generate presentation items (published information).

Morag discloses a method of generating a photographic album comprising providing a plurality of digitally encoded images (published information) and automatically analyzing the images to generate an album. Morag further discloses that after the images and instruction (published information) for album arrangement are received by the service provider, an optimal layout of images in the album is determined.

Nitta discloses user profile table includes a field for recording maximum number of pages.

Claim 2 is allowed because the prior art of record does not expressly disclose alone or in combination a template selection device that selects a template out of the template storage device according to an average character number per page, the average character number per page being based on a total character number of all unpublished articles, a maximum page number to be displayed that stored in a user profile table, and a page number of a layout region to be processed.

2. The dependent claims 3-4 further limit independent claim 2. Claims 6-8 and 21 are considered allowable for the same reasons set forth for claims 2-4 above.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
